Qonnectis Complete for Key Customers

WEB SERVICES AND REMOTE LOGGING FOR YOUR MOST IMPORTANT ACCOUNTS

- ▶ Qonnectis Complete for Key Customers allows water companies to quickly and easily provide a range of value-added and branded services to their most important clients, maximising customer service and introducing opportunities for additional revenues.

Qonnectis Complete for Key Customers is an integrated system to collect flow data from the meter and deliver it to the web daily. Water companies can provide their key accounts with instant access to their meter data. It is fully branded for water utilities in order to maximise their relationships with their key accounts.

Implementation is simple and Qonnectis will provide full installation, data collection and web services on behalf of the water company - making roll-out quick and trouble-free.

Get closer to your bulk customers with Qonnectis Complete.

FEATURES

- A fully-integrated end-to-end service from meter to desktop
- Provides your customers with access to water consumption data from a simple web browser
- Easy implementation: Qonnectis takes care of the installation, data collection, maintenance and web services
- Fully branded: Your brand and customer image is highly valuable; the customer web site is fully customisable to maintain and strengthen your customer relationship
- The myMeter web pages give your customer full meter reads, historical charting and alerts via email or SMS
- The iStaq IP68 data logger provides leading-edge remote data collection in a robust and reliable device
- Uses an industrial-strength utility Oracle database to store data securely and, if needed, integrate with existing utility systems

* Offer expires 31/12/2006, terms and conditions apply
